ABSTRACT: This study analyzed the accuracy of informative text translation on the bilingual website *Berita2Bahasa.com*. Using a descriptive mix method, the research applied Larson's translation theory and Nababan's accuracy assessment model. The dataset comprised 20 data points from four political news articles. Findings indicated an average accuracy score of 2.5 on a 3-point scale, with 60% accurate, 20% less accurate, and 3.33% inaccurate translations. The article *Indonesians Vote in Regional Election Seen as Test for Prabowo* was the most accurate. This study concluded the importance of maintaining original meaning and cultural context in political news translations.

Keywords: Translation Accuracy, Informative Text, Political News, Nuance, Assessment Model

1. Introduction

Translation is closely related to accuracy, which is a critical measure of translation quality (Sangeetharaj & Shanmugasundaram, 2021). In news reporting, accuracy is vital as it conveys timely and urgent information. According to Mustahira & Amin (2023), translation errors can alter the intended message, leading to misinterpretation and loss of essential details, particularly in political news. The nuances of translation can significantly affect how readers interpret political texts, as this field often carries multiple meanings and connotations across different cultures. Consequently, the politicization of news can undermine journalistic credibility and erode public trust, hindering meaningful dialogue and exacerbating polarization in public discourse (Zurriyati et al., 2023).

In sensitive contexts, such as political or scientific texts, translation accuracy is not merely stylistic but essential. Effective equivalence is achieved when every nuance of the original meaning is preserved, ensuring clarity in the target language (Sayogie & Supardi, 2021). The accuracy of translations impacts public trust in online news, especially regarding political issues (Ningtyas et al., 2024).

Berita2Bahasa.com serves as a bilingual news source, presenting Indonesian texts translated into English. For instance, the article titled "*Jokowi Minta Izin Parlemen Pindahkan Ibu Kota ke Kalimantan*" was translated as "*Indonesian Leader Promises to Move Capital City, Boost Economy*", which lacks precision in conveying the original meaning.

Previous research on Berita2Bahasa includes a study by Yuniartati & Pastika (2020), which focused on critical discourse analysis of political news translations. Another study by Rasyki et al. (2020) examined the gains and losses in translation based on equivalence theory, while Mu'amanah & Yastanti (2021) explored translation ideologies employed on the site. Despite these studies, there remains a need for research focusing on translation accuracy, particularly regarding the nuances between source and target languages. Accurate translations are crucial for providing valid information that influences public decisions.

This research aims to examine the accuracy of translations on the Berita2Bahasa website, focusing on political news articles published between August and November 2024. The articles were translated by Novita Cahyadi and Cahyani Harzi for the August-September period, and by Dhelia Gani and M. Achsan Atjo for the October-November period.

2. Method

This research utilized a mixed-methods, this approach, consistent with Creswell (2018) assertion that mixed methods research involves collecting both quantitative and qualitative data, integrating the two forms of data, and using distinct designs that may involve philosophical assumptions and theoretical frameworks aimed to assess the accuracy in understanding the differences in the nuances of the source language and the target language, thereby maintaining the clarity of political information in the online media news of the Berita2Bahasa.

3. Findings and Discussion

In this research, the researcher analyzes selected sentences from four articles that discuss political issues in Indonesia. The researcher will choose 5 sentences from each title to represent the whole article, including the first article titled *"Indonesians Vote in Regional Election Seen as Test for Prabowo"*, consists of 20 sentences of which 5 sentences are analyzed. The second article, *"Indonesia-Ghana Strengthen Health and Energy Cooperation"*, contains a total of 22 sentences, with 5 sentences selected for review. The third article, *"Indonesia Becomes Reliable Development Partner for Africa"* includes 25 sentences and 5 sentences are scrutinized. The fourth article, *"President Jokowi Encourages TNI-Polri to Implement Spirit of IKN Transformation"* has 24 sentences, with 5 sentences chosen for examination. Overall, a total of 20 sentences is analyzed from the four articles, contributing to a comprehensive analysis of 20 data points from the original 91 sentences. This data will be used to assess the accuracy of translations based on the theories of Larson (1998) and Nababan et al. (2012).

3.1. Data Analysis

This research analyzes the accuracy of political news translation by classifying five articles into two main categories. The first category focuses on political campaigns, while the second category focuses on political education. The data can be analyzed to identify patterns and levels of translation accuracy within the context of each category.

3.1.1. Translation Accuracy of Factual Information in Political Campaign

The analysis of translation accuracy for political campaigns includes Articles 1 and 4.

Article 1 : Indonesians Vote in Regional Election Seen as Test for Prabowo examines the upcoming regional elections as a critical test for Prabowo.

Article 4 : President Jokowi Encourages TNI-Polri to Implement Spirit of IKN Transformation focuses on President Jokowi's initiative for the Indonesian National Armed Forces and Police to embrace the IKN transformation spirit.

Together, these articles provide insights into significant political events and government initiatives, enhancing the understanding of Indonesia's political dynamics.

Article 1 : *Media Asing Sebut Pilkada Serentak 2024 sebagai Ujian bagi Prabowo*

Datum 1

ST : *Rakyat Indonesia memberikan suara pada Rabu (27/11) untuk memilih kepala daerah*

TT : Indonesians voted on Wednesday (27/11) to pick local leaders

The translation is deemed accurate as it effectively conveys the lexical meaning of the source text. Analysis of Datum 1 indicates that the translation of "*Rakyat Indonesia memberikan suara pada Rabu (27/11) untuk memilih kepala daerah*" to "Indonesians voted on Wednesday (27/11) to pick local leaders" successfully captures the same meaning, highlighting the voting action and the context of local elections. The term "*Rakyat Indonesia*" is aptly translated as "Indonesians", maintaining the subject's essence, while "voted" accurately reflects the action, and "to pick local leaders" conveys the voting purpose. Overall, this translation is clear and precise, warranting a score of 3 for its accuracy and effectiveness.

Datum 2

ST : *Tempat Pemungutan Suara (TPS) dibuka dari pukul 7:00 pagi hingga 1:00 siang*

TT : Polls were open from 7:00 am to 1:00 pm

The translation is considered accurate as it effectively conveys the lexical meaning of the source text. Analysis of Datum 2 reveals that the translation of "*Tempat Pemungutan Suara (TPS) dibuka dari pukul 7:00 pagi hingga 1:00 siang*" to "Polls were open from 7:00 am to 1:00 pm" successfully communicates the same information regarding polling hours. The term "*Tempat Pemungutan Suara*", aptly translated as "Polls", accurately reflecting the voting location, while the time format is consistently maintained, clearly indicating the hours of operation.

Datum 3

ST : *Menurut peraturan Komisi Pemilihan Umum (KPU)*

TT : According to the General Elections Commission (KPU) Regulation

The translation is deemed accurate as it effectively conveys the lexical meaning of the source text. Analysis of Datum 3 indicates that “*Menurut peraturan Komisi Pemilihan Umum (KPU)*” translates to “According to the General Elections Commission (KPU) regulation,” accurately reflecting the source’s intent regarding the regulation. The phrase “*Menurut peraturan*” is well-translated as “According to the regulation”, preserving the original reference to the commission’s rules. Additionally, “*Komisi Pemilihan Umum (KPU)*” is correctly rendered as “General Elections Commission”, a widely accepted translation of the institution’s name.

Datum 4

ST : *Untuk menghindari putaran kedua*

TT : To avoid a second-round runoff

From the translation, the accuracy of this translation is considered less accurate because it loses the nuance of the term *runoff* in the context of re-election. Analysis for Datum 4 shows that while the translation conveys the general meaning, it does not fully capture the specific electoral context implied in the source text. The source text (ST) “*Untuk menghindari putaran kedua*” translates to target text “*To avoid a second-round runoff*” in the target text (TT). While “*To avoid*” accurately reflects the intention, the term *putaran kedua* is translated as *second-round runoff*, which may not fully convey the idea of a re-election scenario that the original phrase suggests. The nuance of a “*runoff*” typically refers to a situation where no candidate achieves the required majority, leading to a subsequent election, which may not be explicitly clear in the translation. In conclusion, this translation demonstrates a moderate level of accuracy, but the loss of the specific nuance regarding re-election affects its effectiveness. Therefore, it warrants a score of 2 for its accuracy and a score of 2 for its overall effectiveness in conveying the intended message.

Datum 5

ST : *Hasil resmi diharapkan akan diumumkan paling lambat pada tanggal 15 Desember*

TT : Official results are expected to be announced by December 15 at the latest

From the translation, the accuracy of this translation is considered accurate as it effectively conveys the meaning of the source text. Analysis for Datum 5 shows that this translation is both accurate and clear. The source text (ST) “*Hasil resmi diharapkan akan diumumkan paling lambat pada tanggal 15 Desember*” translates to “*Official results are expected to be announced by December 15 at the latest in the target text*” (TT), maintaining the same intent and information. The phrase “*Hasil resmi diharapkan*” is accurately translated as *Official results are expected*, which captures the anticipation of the announcement. The expression “*paling lambat pada tanggal 15 Desember*” is effectively rendered as “*by December 15 at the latest*”, clearly indicating the deadline for the announcement.

Article 4 : President Jokowi Encourages TNI-Polri to Implement Spirit of IKN Transformation

Datum 6

ST : *Pejabat Kotama TNI dan Polri*

TT : TNI and Polri Officials

From the translation, the accuracy of this translation is considered less accurate because it loses the specificity of the term "*Kotama*". Analysis for Datum 6 shows that while the translation conveys the general meaning, it does not fully capture the hierarchical context implied in the source text. The source text (ST) "*Pejabat Kotama TNI dan Polri*" translates to "*TNI*" and "*Polri Officials*" in the target text (TT). However, the term "*Kotama*" specifically refers to high-ranking officials within the Indonesian National Armed Forces (TNI) and the National Police (Polri). By omitting "*Kotama*", the translation loses important context regarding the rank and status of these officials. In conclusion, this translation demonstrates a moderate level of accuracy, but the loss of specificity regarding the rank of the officials affects its effectiveness. Therefore, it warrants a score of 2 for its accuracy and a score of 2 for its overall effectiveness in conveying the intended message.

Datum 7

ST : *Bapak-Ibu bawa pulang ke daerah*

TT : bring back to the regions

From the translation, the accuracy of this translation is considered less accurate because a word has been omitted, specifically "*Bapak-Ibu*", which conveys respect and formality. Analysis for Datum 7 shows that while the translation conveys the general meaning, it fails to capture the cultural significance and politeness embedded in the original phrase. The source text (ST) "*Bapak-Ibu bawa pulang ke daerah*" translates to "*Bring back to the regions*" in the target text (TT). However, the term "*Bapak-Ibu*" refers to "*Mr. and Mrs.*" or "*Ladies and Gentlemen*", which is a respectful way to address a group of people. By omitting this honorific, the translation loses an important aspect of the original message, which is the formality and respect intended by the speaker. In conclusion, this translation demonstrates a moderate level of accuracy, but the

Datum 8

ST : *karakter kepribadian Indonesia maju*

TT : personality of advanced Indonesia

The accuracy of this translation is considered inaccurate because it alters the original meaning. The translation fails to convey the concept of "*Indonesia Maju*", which refers to a national vision and collective aspirations. The phrase "*Indonesia maju*" carries significant ideological weight, but the translation "*personality of advanced Indonesia*" reduces it to a flat and less meaningful description. The omission of the word "*karakter*" and the simplistic rendering of "*maju*" strip the phrase of its motivational meaning. Therefore, this translation is ineffective in conveying the intended message, resulting in a score of 1 for accuracy.

Datum 9

ST : *bangsa yang maju*

TT : advanced nation

The accuracy of this translation is considered accurate because it conveys an equivalent meaning. The phrase "*bangsa yang maju*" directly translates to "*advanced nation*", effectively capturing the essence of the original text. Both the source text and the target text communicate the idea of a nation that is progressive or developed. The translation maintains the intended meaning without losing any cultural or contextual significance. Therefore, it earns a score of 3 for accuracy.

Datum 10

ST : *membawa kembali semangat transformasi*

TT : bring the spirit of transformation

The accuracy of this translation is considered inaccurate because it alters the original meaning. The translation "*bring the spirit of transformation*" does not maintain the context of the phrase "*membawa kembali semangat transformasi*", which should mean to restore the spirit of transformation. The use of the word "*kembali*" (back) is crucial to indicate that this spirit once existed and needs to be revived. Therefore, a more accurate translation would be "*bring back the spirit of transformation*" to preserve the intended context. This translation receives a score of 1 for accuracy as it fails to convey the correct meaning.

3.2.2. Translation Accuracy of Factual Information in Political Education

The Accuracy of Translation of Factual Information in Political Education includes articles number 2 and 3. The second article, "*Indonesia-Ghana Strengthen Health and Energy Cooperation*", highlights Indonesia's collaboration with Ghana across various sectors, while the third article, "*Indonesia Becomes Reliable Development Partner for Africa*", emphasizes Indonesia's commitment to supporting development in Africa through collaborative programs. Both aim to educate the audience about Indonesia's diplomatic efforts, fostering mutual growth and understanding, and providing insights into Indonesia's foreign policy and its impact on global development.

Article 2 : Indonesia-Ghana Perkuat Kerjasama Kesehatan dan Energi

Datum 11

ST : *Indonesia-Ghana Perkuat Kerjasama Kesehatan dan Energi*

TT : Indonesia-Ghana Strengthen Health and Energy Cooperation

From the translation about the accuracy of this translation is considered accurate because the meaning has conveyed the source text lexical meaning. This translation effectively utilizes appropriate lexicon, with "*Perkuat*" rendered as "*Strengthen*" and "*Kerjasama*" as Cooperation. The grammatical structure is preserved between the two languages, ensuring that the original intent remains intact. The methods employed for evaluation, including comparisons with the original text and back-translation, suggest that the translation remains true to its source and flows naturally in English. Utilizing the

3-2-1 assessment scale outlined by Nababan et al. (2018), this translation receives a score of 3, reflecting a high degree of accuracy.

Datum 12

ST : *Presiden Jokowi dan Presiden Ghana Nana Addo Dankwa Akufo-Addo usai membahas kerjasama Indonesia-Ghana dalam berbagai sektor*

TT : President Jokowi and Ghanaian President Nana Addo Dankwa Akufo-Addo after discussing Indonesia-Ghana cooperation in various sectors

The accuracy of this translation is considered less accurate due to the unequal mention of titles. In the source text, both leaders are referred to with their respective titles: “*Presiden*” for Jokowi and “*Presiden Ghana*” for Nana Addo Dankwa Akufo-Addo. However, in the translation, “*President Jokowi*” is used alongside “*Ghanaian President Nana Addo Dankwa Akufo-Addo*”, which creates inconsistency in how the titles are presented. A more consistent translation would be “*President Jokowi and President Nana Addo Dankwa Akufo-Addo of Ghana after discussing Indonesia-Ghana cooperation in various sectors*”. This would ensure that both leaders are referred to with the same level of formality. The accuracy of the translated meaning is appropriate, but the title usage is inconsistent. Therefore, the accuracy score is 2 due to this inconsistency.

Datum 13

ST : Selamat datang di Indonesia, dan terima kasih atas kehadiran Yang Mulia.

TT : Welcome to Indonesia, and thank you for your presence

The accuracy of this translation is considered less accurate because there is a lexical meaning from the source text that has been omitted. The analysis for Datum 7 indicates that both the source text (ST) and the target text (TT) adequately maintain the structure, as the phrase “*Selamat datang*” is effectively translated as “*Welcome*”, which is a direct and commonly used expression in English. Additionally, “*terima kasih atas kehadiran Yang Mulia*” is translated as “*thank you for your presence*”, which captures the respectful acknowledgment intended in the original text. However, the phrase “*Yang Mulia*”, which should be translated as “*Your Majesty* or *Your Honor*”, is omitted in the target text. This omission may reduce the level of formality and respect conveyed in the translation. Nevertheless, the sentence structure in English sounds natural and is easy to understand. Therefore, this translation receives a score of 2 for accuracy due to the omission of an important element that should be present to reflect the appropriate formal context and respect.

Datum 14

ST : *terkait penandatanganan nota kesepahaman (MoU) tentang pengawasan pangan dan obat-obatan*

TT : regarding the signing of a memorandum of understanding (MoU) on food and drug supervision

The accuracy of this translation is considered because it effectively conveys the lexical meaning of the source text. The phrase “*terkait penandatanganan*” is accurately translated as “*regarding the signing*”, which maintains the intended meaning. Additionally, “*nota kesepahaman (MoU)*” is correctly translated as “*memorandum of*

understanding (MoU)”, and *“pengawasan pangan dan obat-obatan”* is translated as *“food and drug supervision”*, which accurately reflects the original context. The translation maintains clarity and precision, ensuring that the formal nature of the subject matter is preserved. Therefore, this translation receives a score of 3 for accuracy as it successfully communicates the intended message without any omissions or alterations in meaning.

Datum 15

ST : *Hubungan bilateral antara Indonesia dan Ghana telah terjalin selama 65 tahun*

TT : The bilateral relationship between Indonesia and Ghana has existed for 65 years

The accuracy of this translation is accurate because it effectively conveys the lexical meaning of the source text. Datum 8 indicates that the translation from the source text (ST) and the target text (TT) *“has existed for 65 years”* is well-executed and accurate. This translation successfully conveys the original meaning precisely, where the phrase *“Hubungan bilateral”* is translated as *“The bilateral relationship”*, maintaining the formal and diplomatic context. The term *“telah terjalin”* is translated as *has existed*, reflecting the nature of the relationship that has been ongoing for a certain period, and the phrase *“selama 65 tahun”* is accurately translated as *for “65 years”*, clearly indicating the duration of the relationship. This translation is clear and precise, ensuring that the information conveyed remains intact. The sentence structure in English sounds natural and coherent, making it easy to understand. Therefore, this translation receives a score of 3 for accuracy, as it successfully communicates the intended message without any omissions or alterations in meaning.

Article 3 : Indonesia Becomes Reliable Development Partner for Africa

Datum 16

ST : *Indonesia Jadi Mitra Pembangunan Andal bagi Afrika*

TT : Indonesia Becomes Reliable Development Partner for Africa

The accuracy of this translation is accurate because it effectively conveys the lexical meaning of the source text. The phrase source text (ST) *“Indonesia Jadi Mitra Pembangunan Andal”* is translated precisely as *“Indonesia Becomes Reliable Development Partner”*, maintaining the intended meaning. The term *“andal”* is translated as *“reliable”*, reflecting the positive nature of the partnership, and *“bagi Afrika”* is accurately translated as *“for Africa”*, clearly indicating the purpose of this partnership. However, it should be noted that the accuracy of this translation is considered accurate because there is a lexical meaning from the source text that has been omitted. This translation is clear and precise, ensuring that the information conveyed remains intact. Therefore, this translation receives a score of 3 for accuracy, as it successfully communicates the intended message without any omissions or alterations in meaning.

Datum 17

ST : *Negara donor baru yang diakui*

TT : recognized new donor country

The accuracy of this translation is considered inaccurate because it fails to convey the complete meaning of the source text. The phrase source text (ST) "*Negara donor baru yang diakui*" is translated to target text (TT) "*recognized new donor country*", which lacks the necessary grammatical structure and clarity in English. Firstly, the translation omits the subject "*Negara*" (country) at the beginning of the target text, making it sound incomplete. Overall, this translation does not effectively communicate the original message and lacks the necessary clarity and grammatical correctness. Therefore, it receives a score of 1 for accuracy, as it fails to preserve the intended meaning and structure of the source text.

Datum 18

ST : *Posisi Indonesia di kancah internasional*

TT : Indonesia's position internationally

The accuracy of this translation is considered less accurate because it fails to fully capture the nuance of the source text. The phrase "*Posisi Indonesia di kancah internasional*" is translated as "*Indonesia's position internationally*", which, while understandable does not convey the specific context implied by the term "*kancah*". Therefore, while the translation is clear, it does not fully represent the richness of the original phrase. As a result, this translation receives a score of 2 for accuracy, as it captures the basic meaning but omits important contextual details.

Datum 19

ST : *Saya ingin menekankan*

TT : I would like to emphasize

The accuracy of this translation is accurate because it effectively conveys the meaning of the source text. The phrase *Saya "ingin menekankan"* is translated as "*I would like to emphasize*", which accurately reflects the speaker's intention to highlight or stress a particular point. The translation maintains the polite and formal tone of the original phrase, ensuring that the message is communicated clearly. Additionally, the use of "*would like*" in the target text appropriately conveys a sense of politeness, which is consistent with the original Indonesian expression. Overall, this translation successfully captures the intended meaning without any omissions or alterations. Therefore, it receives a score of 3 for accuracy, as it effectively communicates the original message in a clear and appropriate manner.

Datum 20

ST : *Dan mendukung program vaksinasi di negara-negara Afrika lainnya, ungkap Jokowi*

TT : and support vaccination programs in other African countries, said Jokowi.

The accuracy of this translation is assessed as less accurate due to a significant grammatical error. The phrase source text (ST) "*Dan mendukung program vaksinasi di negara-negara Afrika lainnya, ungkap Jokowi*" is translated as "*and support vaccination*

programs in other African countries, said Jokowi". The main issue with this translation is the use of the word "support", which should be changed to "supports" to match the third-person singular subject, Jokowi. Therefore, the correct translation should be "*and supports vaccination programs in other African countries, said Jokowi*". The error is significant because it affects the grammatical correctness of the sentence, and the use of "support" instead of "supports" can change the meaning of the sentence. A more accurate translation would ensure that the verb tense and subject-verb agreement are correct, providing a clearer and more accurate representation of the original text. As a result, this translation receives a score of 2 for accuracy, as it captures the basic meaning but omits important contextual details.

4. Conclusion

The research findings indicate that the accuracy of the translations of informative texts on Berita2Bahasa.com reaches a fairly satisfactory level, with an average score of 2.5 on a scale of 3.0. This result suggests that the majority of the translated content is able to maintain the original meaning and essence of the message from the source text. However, some weaknesses related to inaccuracies in the translation of key terms and grammatical structures were still found, which sometimes affect the reader's understanding. This study provides several important insights: first, regarding the strategies used by translators in handling informative texts; second, the challenges faced in maintaining content accuracy; and third, the implications of less accurate translations on reader comprehension. These findings also confirm that in bilingual media such as Berita2Bahasa.com, translation accuracy is not merely a technical linguistic issue, but also involves matters of translation nuance.
